INTERIOR FINISH SYSTEM

From Old World Elegance

To

Vivid Modern Brilliance

**Incredibly Durable and
Surprisingly Affordable**

Variance Interior Finish System is a 100% acrylic polymer based finish system that has adapted the proven qualities of acrylic textured finishes to limitless color and texture possibilities for interior applications. With ease of application and tremendous durability, Variance is a revolutionary finish system which "affords" the aesthetic beauty of more costly gypsum and lime plasters. The system is easily maintained, extremely color fast and crack resistant.

Color possibilities are virtually limitless with our color lab's ability to match physical samples or selections from any color chart. "Variance" in color, and mottled tones can also be achieved with proven, simple techniques developed by skilled craftsmen.

Texture variety is also a trademark of Variance. Old World, Tuscany, Southwestern and Adobe or maybe a Smooth and Brilliant Modern finish- what works for you?

Economical. Variance can be applied directly to drywall, both new and existing or virtually any other substrate suitable for a plaster application.

The Variance System

Acrylic textured, colored primer. Easily applied to prepared drywall, painted surfaces, plaster and most substrates. To promote adhesion and minimize absorption differences between varying substrates.

VARISAND

Precision blended acrylic polymers, marble aggregates and high quality pigments. VariSand is trowel applied over VariPrime as a basecoat and leveler for minor surface irregularities. Provides excellent durability and allows for many texture options when combined with VariTex. VariSand may also be used as a finish to provide a beautiful suede like sand finish.

VARITEX

The hallmark of the Variance system, VariTex is a remarkable blend of acrylic polymers and proprietary ingredients producing a smooth, easily applied, high performance plaster. Trowel applied using varying techniques developed by Variance, the beauty of many plaster effects can be achieved.

VARISEAL

To complete the Variance system. For ultimate protection and ease of maintenance, VariSeal is available in matt or gloss finish. Easily applied and extremely long lasting.

Services

Variance offers the following support and service features to compliment our quality finish products

Training - Variance offers application workshops and on site training to applicators for the unique application techniques developed by our staff.

Samples - Special Variance samples are available to fulfill your specified color and texture requirements.

Color - Color matching and consultation for special color blends and variations are available upon request.

Accessories - Cleaners, waxes and application tools are also available from Variance.
